

T-3601AC

New!

*Intermediate Piston
Belleville Spring Compressor
1989-up E4OD/4R100*

Our simple yet heavy-duty 3-piece tool installs quickly and tackles the job in moments.

A solid design that will last you a lifetime! T-3601AC consists of a comfortably sized knob, finely-threaded to ease the effort required. Gold anodized for durability, notice how the longer bar features rounded tapers at each end. This helps guide the tool into the Overdrive clutch's snap ring groove sparing you from a moment of frustration. The bars are milled from 1/2" thick steel that won't flex or wear-out over time.

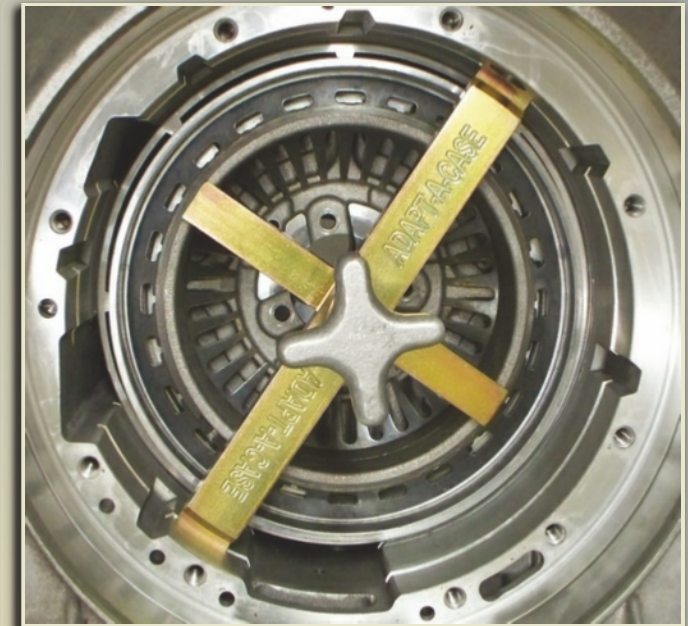

The right tool for the job, new from the engineers at Adapt-A-Case!

Answering challenges with profitable solutions.
